

Figure 1

FIG. 1 is a schematic diagram of a satellite constellation system for a protected site. The diagram shows a constellation of satellites (Satellite 3) and a protected site (Protected Site 8). The protected site is defined by a dashed line and contains a Confidence Polygon 9 (Zone of Interference). The Confidence Polygon 9 is a hexagon with vertices labeled Point 20 and Point 21. A User Terminal 5 is located within the Confidence Polygon 9. A Gateway 1 is located outside the Confidence Polygon 9, and a Gateway Potential Service Area 6 is defined by a dashed line around the Gateway 1. A Gateway Commercial Service Area 7 is also defined by a dashed line around the Gateway 1. The diagram also shows a Constellation of Satellites 4 and a Protected Site 8.

Figure 1 consists of 11 scatter plots, labeled (a) through (k), arranged vertically. Each plot shows the relationship between a specific variable and the 'Number of children' (ranging from 0 to 10 on the x-axis). The y-axis for all plots is labeled 'Variable' and ranges from 0 to 10. The variables are: (a) age, (b) age squared, (c) age cubed, (d) age to the fourth power, (e) age to the fifth power, (f) age to the sixth power, (g) age to the seventh power, (h) age to the eighth power, (i) age to the ninth power, (j) age to the tenth power, and (k) age to the eleventh power. Each plot displays a series of data points that form a downward-sloping curve, indicating a negative relationship between the variable and the number of children. The curves are steeper for higher powers of age.

Figure 3

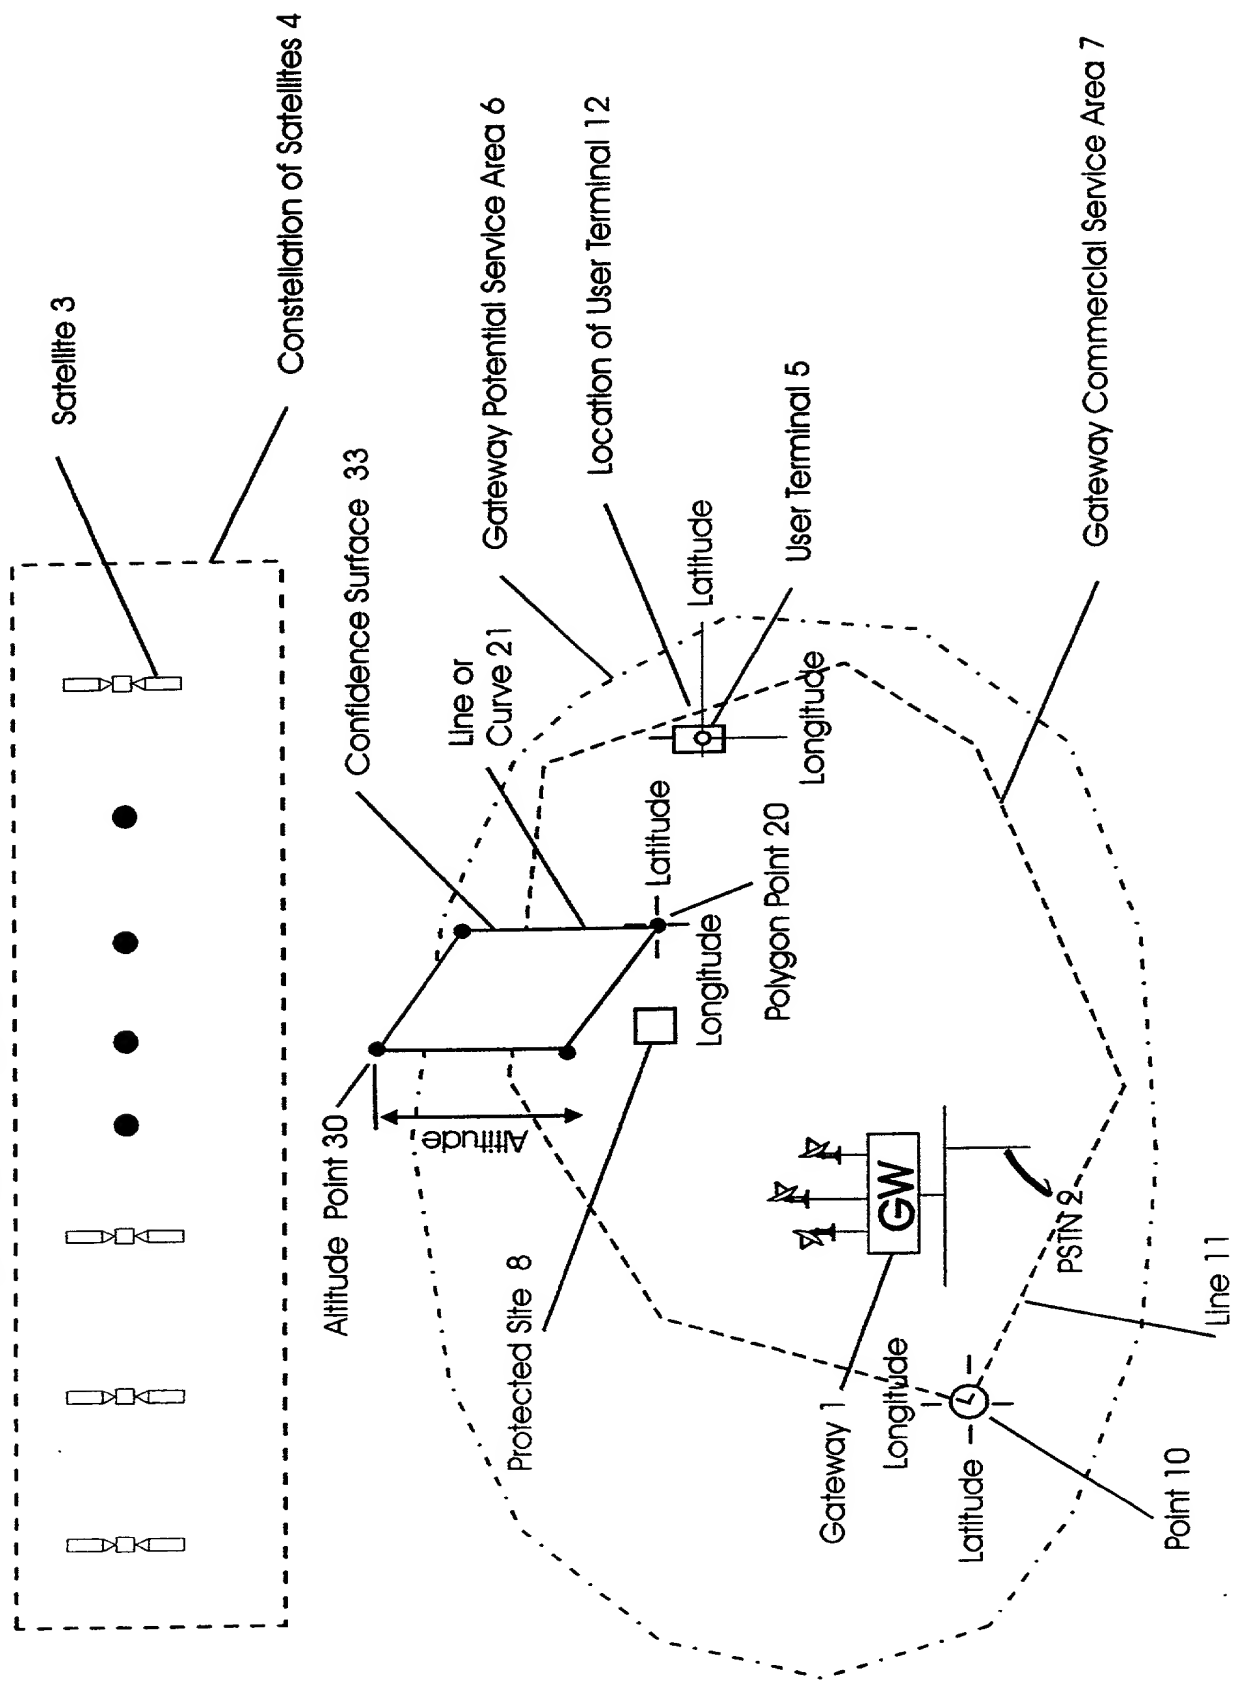

Figure 4

FIG. 4 is a block diagram of a system for providing a shared confidence polygon for a user terminal.
